

DETROX
Liquid descaler

DESCRIPTION

DETROX are descaling agent used to remove lime scales and deposits inside dishwasher's tank, coffee machines and clean stainless steel. This product descales, eliminates the tarnishing and emphasizes the shine of stainless steel without living residues. DETROX is a product without phosphorus that damage metal, dishes and glassware. It prevents premature wearing from the heating elements.

ADVANTAGES

1. It is biodegradable, chlorine free and phosphate free
2. Made with 100% active cleaning ingredients that removes limestone easily.
3. Descales, eliminates the tarnishing and emphatizes the shine of stainless steel.
4. Safe for metal, dishes and glassware.

TECHNICAL DATA

pH (as is)	1.0
Density (20°C).....	1.20 g/cc
Colour.....	Clear
Fragrance.....	None
Characteristic.....	None
Biodegradability.....	Complete
Freezing Stability.....	Keep out from freezing

Degradability determined in accordance with OECD no. 301D.

DIRECTIONS

DE-LIMING DISHMACHINES

High-temperature dishmachines: 1:17

Low-temperature dishmachines: 1:5

1. Drain tank of dishwasher and be sure that the automatic fill-up system will not dispense any cleaning, rinsing or disinfecting solution.
2. Fill tank with clear water and start machine.
3. Empty the proper quantity of CITRICA into tank and allow machine to run until lime scale disappears. Apply this product where the solution doesn't reach deposits.
4. Drain tank and refill with clear water. Run 5 minutes to rinse and then drain.
5. If necessary, scrape excess deposit and repeat the procedure.

DESCALING COFFEE URNS

Fill the water reservoir with hot water and add 6ml of CITRICA per litre of water. Heat rinse with fresh water.

CLEANING STAINLESS STEEL SURFACES

Apply the product full strength on surfaces to clean with a sponge or a cloth. Rinse thoroughly with water and wipe dry. Rinse thoroughly the sponge or the cloth before washing it or reusing it.
