

CHLOROMOUSSE DIN : 02504898

Stain remover, bleach and disinfectant foam.

DESCRIPTION

CHLOROMOUSSE can be used in industrial, institutional, hospital and domestic environments. CHLOROMOUSSE is an all-in-one product. Thanks to the chlorine and alkaline agents it contains, it has exceptional disinfecting and stain removing properties. It eliminates bacteria, fungi and viruses, as well as bad smells and black and colored stains caused by mold in bathrooms, kitchens and food factories, etc. Its foaming power makes it possible to see where it is applied and it can be used in hard-to-reach places.

ADVANTAGES

1. Kills 99.9% of bacteria, fungi and viruses.
2. Exceptional disinfectant, bleach and stain remover.
3. Removes mold and mildew from surfaces and disinfects them.

TECHNICAL DATA

pH (as is)	12.5 – 13.0
Density (20°C)	1.085
Sodium hypochlorite.....	2.88% p/p
Color	Transparent Yellowish
Odor.....	Chlorine
Characteristic.....	Oxidizing
biodegradability	Complete
Freeze/thaw stability.....	Keep out of frost

The biodegradability of the ingredients has been determined according to OECD test no. 301D.

INSTRUCTIONS FOR USE

Read the label before use.

FOR DISINFECTION OF HARD AND NON-POROUS SURFACES: For heavily soiled surfaces, please clean hard areas and surfaces such as grout joints or walls and floors beforehand. To remove black stains caused by mildew, spray directly on the stain and wait 10 minutes for it to disappear, then rinse with water. To minimize chlorinated fumes during the treatment, it is suggested to ventilate well. In any application, a rinse is necessary. Test on a hidden area for vérifier surface compatibility and colorfastness. Leave the surface wet for 10 minutes to loosen and kill all target microorganisms. Do NOT combine with any other product.
